About SAMANWARE TECH

SAMANWARE TECH is a trusted software development partner, pioneering innovation in transformative digital solutions. With a strong emphasis on innovation and quality, our experienced team crafts software applications that optimize business processes and elevate user experiences. We have successfully developed more than 7 impactful industrial systems to date.

As an experienced IT solutions provider, we offer a comprehensive range of services, including high-loaded enterprise systems, web applications, mobile applications, Cloud Computing, Infrastructure Building, IT Consulting, Capacity Building, and Training. Our expertise extends to custom software development for various industries, serving clients primarily from Ethiopia and overall Africa.

At SAMANWARE we take pride in being at the forefront of innovation. We are committed to delivering cutting-edge solutions that drive digital transformation and empower businesses to thrive in the modern era.

Vision And Mission

Vision

Our vision at SAMANWARE TECH is to be a leading force in the digital revolution, setting new standards of excellence in software development and technology solutions. We envision a future where businesses harness the power of cutting-edge technologies to drive growth, efficiency, and innovation. By continuously pushing the boundaries of what is possible, we aspire to be at the forefront of innovation, shaping the digital landscape in Ethiopia and Africa as a whole. We are committed to delivering exceptional value to our clients, building long-term partnerships, and creating a positive impact on industries and society as a whole.

Mission

At SAMANWAR TECH, our mission is to empower businesses in Ethiopia and across Africa with transformative digital solutions. We strive to be a trusted software development partner, delivering innovative and high-quality software applications that optimize business processes and enhance user experiences. Through our comprehensive range of services and expertise in custom software development, we aim to drive digital transformation and enable businesses to thrive in the modern era.

Company Services

• Software Development

At SAMANWARE TECH, we specialize in developing high-quality web and mobile applications for enterprises at any stage. We prioritize the needs of our clients and ensure their high involvement throughout the development process. Our solutions are human-centric, designed to deliver exceptional user experiences and meet the unique requirements of each project

• Infrastructure engineering

SAMANWARE has team of experienced Cloud, Network, Database, and DevOps Engineers specializing in infrastructure system engineering. We excel in designing and implementing networks, managing data infrastructure, and providing scalable solutions. With our expertise, we support enterprises at any stage, delivering innovative designs tailored to clients' needs for seamless operations and optimal performance

• IT Consulting

SAMANWARE offers expert IT consultation services, providing valuable insights and guidance to businesses seeking to optimize their technology infrastructure and strategies. Our team of seasoned IT consultants possesses a wealth of knowledge and experience across various domains, enabling us to offer comprehensive solutions tailored to the unique needs of each client

• Capacity Building & Training

SAMANWARE provides comprehensive capacity building and training services to empower individuals and organizations in technology. Our diverse programs, led by experienced trainers, enhance skills and knowledge for thriving in the digital landscape. From technical training to soft skills development, we tailor programs to address specific needs. With customized plans and flexible delivery formats, including on-site and online options, we foster continuous learning.

Meet Our Team

SAMANWARE has a highly skilled team consisting of Cloud, AI, and Database Engineers, Cross Platform App Developers, Cybersecurity Specialists, Software Testers, System Analysts, and UI/UX Designers. Additionally, as part of our commitment to mentoring fresh graduates, we offer paid internships to university students every year.

Mr Amanuel Meseret

Chief Executive Office

Holding dual master's degrees in Information Technology and Project Management, he excels in emerging technology and innovation. Recognized for winning the SolveIT 1.0 Regional Competition, he has contributed to impactful projects such as those with the European Union, COHESA, USAID, and the WHO LEAD Initiative. As a proud member of the Internet Society Ethiopian Chapter and an Alumni of the Young African Leaders Initiative (YALI), he actively engages in initiatives that foster digital inclusion and leadership. With experience as Operation Support at American Spaces, a program of the U.S. Embassy, Software Developer at various companies, and as a Regional System Administrator at Safaricom Ethiopia P.L.C., he combines technical expertise, strategic leadership, and a passion for learning to drive innovation and deliver lasting results.

Mr Olijira Tolera

Chief Operation Officer

Holding an MBA and a BA in Accounting, he brings a proven track record as a seasoned leader in administrative and financial operations, with expertise in procurement, contracts, compliance, and strategic planning. With experience in international NGOs such as Plan International, Oxfam, International Medical Corps, VSO, UNHCR, Action for Development and Save the Children, he has excelled in streamlining operations, optimizing financial systems, and implementing risk-mitigation policies to drive growth and efficiency. His skills span financial analysis, controllership, supply chain management, and consortium project coordination, combined with expertise in donor and government compliance. Known for his strategic vision, problem-solving acumen, and commitment to excellence, he thrives in driving operational efficiency and achieving long-term objectives.

Mr Samson M.Bekele

Chief Technology Office

Holding a BSc and multiple international certifications in software development and cloud systems, he brings extensive expertise in system decomposition, subsystem management, and leading technical teams. With a proven track record as an instructor at Algorithm Tech, lead developer at Sematha Tech, senior developer at Evangadi Tech, and contributions to organizations like MSF Holland and MSF Belgium, as well as numerous international freelance projects, his experience spans both private and government IT projects, where he has optimized systems for impactful, scalable solutions. Known for his ability to drive business growth through robust, user-focused systems, he combines technical excellence with strategic leadership, fostering innovation and delivering measurable results.

Mr Rediat Terefe

Chief Development Office

Holding a Master's Degree and currently pursuing a PhD, along with international certifications in Software Development and Emerging Technologies, he is an accomplished development leader with a proven track record. His experience includes roles as a Senior Developer at Sematha Technologies, Software Tester at Evangadi Tech, and Lead Developer at ENG CSO, as well as contributions to numerous international freelance projects. He has successfully led and optimized both private and government IT projects, delivering scalable, user-focused solutions that drive business growth. With expertise in evaluating the feasibility and profitability of digital solutions, he applies lean startup principles and leverages minimum viable products to ensure impactful results.

Ethical

We uphold a strong commitment to ethical business practices, ensuring that we engage in jobs that align with majority's value and expectations

End-To-End

We pride ourselves on delivering comprehensive end-to-end technology solutions, progressively consolidated in one place for seamless integration and convenience

Collaboration

We Prioritize a collaboration approach, involving clients in every step of development, fostering open communication for successful outcomes and tailored solutions.

Previous Experience

- [SBC Dashboard for Oromia Health Bureau](#)

In collaboration with FHI 360's USAID-Healthy Behaviors Activity, we are proud to have developed a pioneering Social Behavioral Change Reporting Dashboard for the Oromia Health Bureau. This innovative solution represents a first-of-its-kind tool that facilitates comprehensive reporting and analysis of social behavioral change initiatives

- [eHealth Solution and Policy Registry](#)

We have collaborated in the European Union's BETTEReHEALTH Project, had the privilege of spearheading the development of an electronic registry for eHealth solutions and policies across Africa. Our overarching objectives encompass sharing best practices, strengthening research capacity, providing valuable insights to decision-makers, and showcasing cutting-edge innovations in the field.

- [Smart Employee and Academic Activity Management System](#)

We've Developed the Smart Employee and Academic Activity Management System, a web app for efficient management of Jimma University Medical Center employees. It offers features like staff registration, leave management, department/program management, office management under the dean, and annual plan, curriculum, and student list management. The system also provides data visualization, profile management, password reset, and Scholarship management.

- [Clinic Management System](#)

We've Developed a web app for HealEye Eye Specialty Clinic, centralizing patient, doctor, and admin functions. Patients can schedule appointments, access records, and receive personalized advice. Doctors collaborate and access patient data, while admin staff manage appointments and billing efficiently. Prioritizing security and user-friendliness, the app streamlines healthcare, enhancing patient care.

• AMR Multisectoral Data Sharing Platform

We developed the first-of-its-kind Anti-microbial Resistance (AMR) Multi-Sectoral Data Sharing Platform, integrating sample data from Animal Health, Human Health, and Environmental Health laboratories into a unified system. This platform enables a comprehensive view of antimicrobial resistance and consumption, supporting the enforcement of national AMR policies and strengthening the One Health approach both nationally and continent-wide.

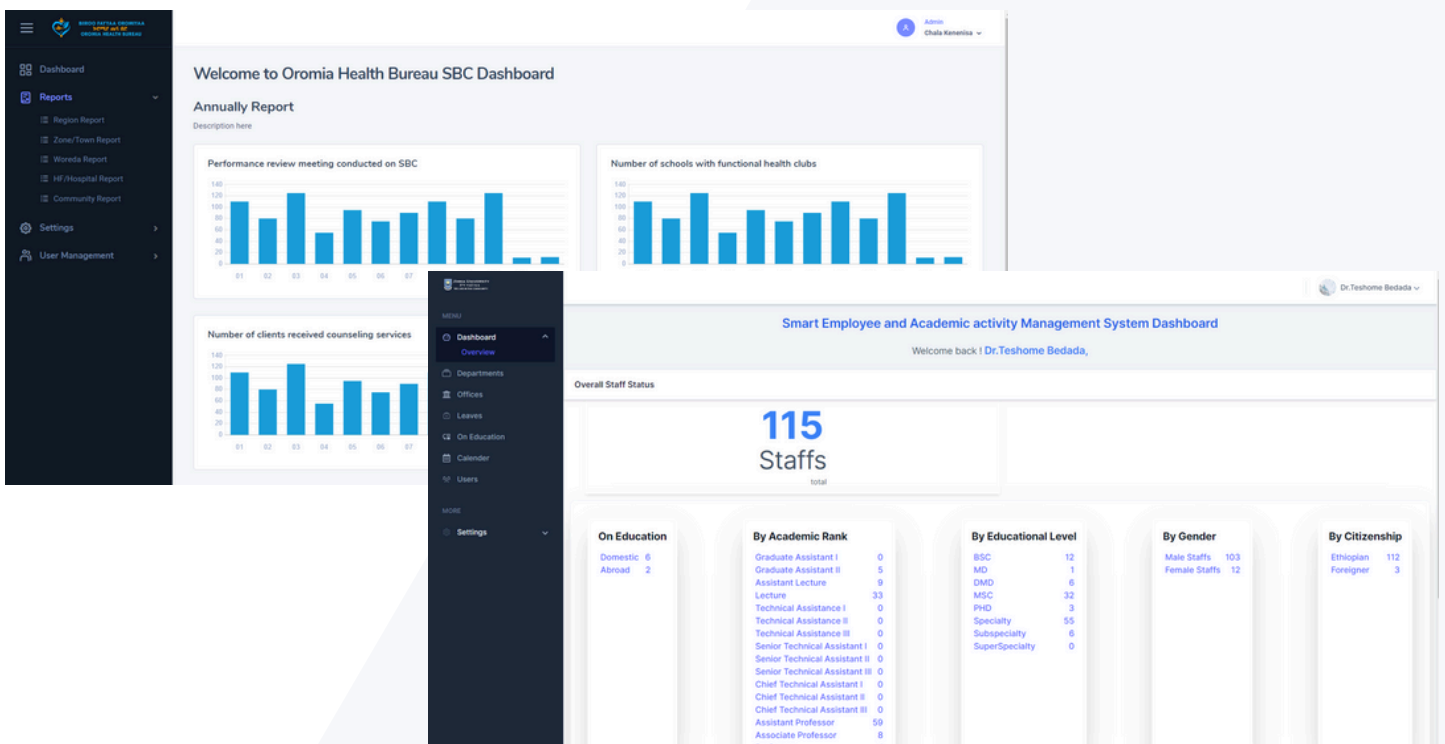

• Hospital Management System

We developed the first-of-its-kind Hospital Management System, integrating sample data from multiple departments into a unified platform. This system provides a comprehensive view of patient data, resource utilization, and hospital operations, supporting evidence-based decision-making and enhancing the efficiency of healthcare delivery.

• Local Production of Antibiotic Disc Information Management

We have developed a web and mobile-based application for a group of experts who won the WHO LEAD Innovation Project. This innovative application is designed to streamline the process of setting up laboratories for antibiotic disc production. It provides comprehensive guidelines on laboratory setup, a marketplace for sourcing raw materials, and tools to manage supply chains effectively.

In addition, the platform facilitates the upload and download of policies, laboratory standards, and best practices, ensuring compliance with global and national regulations. By centralizing these critical functions, the application empowers laboratories to enhance the efficiency and quality of local antibiotic disc production, contributing to improved healthcare outcomes worldwide.

Welcome to TADAs System

AMR Data Sharing Platform

You have access the AMR Data Sharing Platform to manage and track AMR-related data more efficiently.

Human Data

Collecting and sharing comprehensive animal, human, and environmental data is essential in the global fight against AMR, supporting prevention efforts across all sectors.

Animal Data

In LMICs, gathering and sharing data from animal, human, and environmental sectors is crucial for understanding AMR drivers and developing targeted, cost-effective strategies to address it.

Environmental Data

By combining data from these three sectors, it is possible to develop a more integrated and effective strategy to combat AMR, protecting health across species and ecosystems.

This project has been funded and developed by the COHESA Project and its partners.

HealEye clinic

At HealEye, we are dedicated to providing exceptional eye care services and ensuring the well-being of your eyes. Our team of experienced and skilled eye care professionals is committed to delivering personalized care and innovative treatments.

Added-value Package

- **Collaborative Development Approach**

We prioritize a collaborative approach that involves our clients in every step of the development process, fostering open communication and creating a partnership that delivers successful outcomes and tailored solutions meeting their needs.

- **Technical Documentation and Training**

After the development or engineering of the solution, we will create detailed Technical and User Guides for our clients. Additionally, we offer technical and user training to ensure our clients are equipped with the knowledge and skills to effectively utilize the solution.

- **Handover important Resources**

We prioritize delivering need-based solutions, and as part of that commitment, we provide our clients with the source code, design, blueprint, and other important resources of the solutions upon completion

- **3 Months Technical Support**

After project completion and handover, we are committed to providing six months of technical support to ensure our clients' satisfaction aligns with their initial expectations

Thank You

Thank you for choosing SAMANWARE for your project. We greatly appreciate the opportunity to collaborate with you and deliver a solution that meets your needs. Our dedicated team has worked diligently to complete the project and ensure your satisfaction. As a token of our commitment, we are pleased to offer six months of technical support following the project handover. Should you require any assistance or have any questions during this period, our team will be readily available to provide the necessary support. Once again, thank you for entrusting your project to us. We look forward to continued partnership and future endeavors together.
